

## iCAM Wi-Fi Authentication

iCAM Wi-Fi Authentication offers enhanced control over the Wi-Fi access libraries provide to visitors. The solution integrates with the existing wireless solution and works with most manufacturers' hardware.

By authenticating users against the Library Management System (LMS) libraries can ensure Wi-Fi access is limited to members only, and restrict access by borrower category where required, for example members with outstanding fines, children, or members who use the service inappropriately.

The solution utilises the existing Wi-Fi login interface, needs no staff intervention and allows users to access the Wi-Fi as they need to. Where compatible, the configuration can restrict access to opening times, and control session length and number of sessions per day.

iCAM Wi-Fi Authentication offers a comprehensive audit trail and can include detailed management information, reporting on usage and activity by user, location and user groups. In addition to authenticating in real time with the LMS, it can also update the borrower record to give a full and accurate picture of borrower activity.

### Key Features

- Wi-Fi access authenticated against the LMS
- Compatible with all major UK LMS solutions
- Compatible with most UK Wi-Fi hardware
- Full control of Wi-Fi access and usage, configurable by location, opening times and borrower type
- Detailed management information, integrated with the LMS, and other iCAM systems

## Benefits

- Promote library membership
- Integrates with existing LMS system
- Integrates with any existing iCAM products
- Ability to implement charging for members and / or guests if required

As an additional service, we can install hardware and manage your entire wireless solution if you do not currently have a provider or are looking to change supplier.

***"I was impressed by the way that Insight Media managed the project and worked with us and with our corporate network team to enable the rollout of the service on time and on budget. "***

Library Resources Manager, Bedfordshire County Council

***"The implementation was very smooth and integration with our LMS was surprisingly easy, which was key for us because we are not currently allowing non-members to use the Wi-Fi hotspot."***

***"Working with Insight, a known and trusted supplier, meant that this complex project could be completed within a very short timescale whilst making best use of the funding, and we all stayed sane too!"***

Principal Librarian, Falkirk Council
